DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4/20/2007 has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Serhan et al. (US Publication 2002/0143329). Serhan et al. disclose a monolithic device useable to connect adjacent vertebrae comprising a stabilization member (5) and a first and second anchoring portions (15/17) that are monolithically connected (7/9) to the stabilization member. The first and second anchoring members extend perpendicularly from the stabilization member. The device may be used to support adjacent vertebrae (see Fig. 7). Serhan et al. also disclose a monolithic device that is considered porous (see par. 0063, wherein at least collagen would inherently be porous). The anchoring members are also substantially cylindrical.

Art Unit: 3733

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 31-37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Serhan et al. '329 in view of Buron (US Patent 4,743,260). Serhan et al. disclose the claimed device except for, more specifically, pore sizes for example between 190 and 1,200 microns and a lumen extending throughout the device. Buron disclose biocompatible materials that are porous and aid in the acceptance and incorporation of natural bone (Col. 4, lines 45-52). Having pores, may in and of themselves, be considered a "lumen" throughout. Further, it would have been obvious to one having ordinary skill in the art at the time the invention was made to limit the pore size to approximately 190 to 1,200 microns to aid in the incorporation of bone ingrowth, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. In re Aller, 105 USPQ 233.

Response to Arguments

Applicant's arguments with respect to claims 1-7 and 31-37 have been considered but are most in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James L. Swiger whose telephone number is 571-272-5557. The examiner can normally be reached on Monday through Friday, 9:00am to 5:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eduardo Robert can be reached on 571-272-4719. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
